SAATHVIK MAHESHUNI

Brooklyn, NY | 929-783-6609 | sathvikmaheshuni@gmail.com | linkedin.com/in/saathvikmaheshuni

NYU Tandon MS in Management of Technology (STEM, GPA 3.611) with a computer science degree. Builds Excel financial models and SQL analyses; writes one-page recommendations.

EDUCATION

New York University, Tandon School of Engineering, Brooklyn, NY — May 2027
Master of Science, Management of Technology | GPA: 3.611/4.0
Relevant coursework: Financial Analysis for Tech Managers, Economics and Strategy, Business Analytics, Data Visualization for BI

Institute of Aeronautical Engineering, Hyderabad, India — May 2025
Bachelor of Technology, Computer Science and Engineering (AI and ML) | CGPA: 7.78/10 (First Class)
Relevant coursework: Business Economics and Financial Analysis, Probability and Statistics, Linear Algebra and Calculus, Predictive Data Analytics, Statistical Foundations of Data Science, Database Management Systems

PROJECTS

Premium Screen Investment Model | Excel 10-year DCF, scenarios, sensitivity, Tableau dashboard — Oct 2026
- Built a 10-year DCF in Excel to test whether a theater chain should convert standard screens to premium large format, sourcing inputs from the AMC and IMAX FY2025 10-K filings and flagging every assumption without a public source.
- Found a base-case NPV of -$213,905 at 9.5% on a $1.39M conversion (IRR 6.1%, 7.5-year payback), upside $1.65M, downside -$1.79M, break-even at a 115.7% attendance uplift or $6.67 surcharge; recommended converting only high-uplift screens.

E-commerce Operations Analysis | SQL (SQLite), Excel charts, Tableau dashboard, one-page memo — Oct 2026
- Loaded the Olist dataset (99,441 orders, 8 tables) into SQLite and wrote one SQL query per question on 96,470 delivered orders with 13 grain checks; found 6.8% of orders late, averaging 2.27 stars against 4.29 on time, most of them shipped on time.

Event Check-in System Case | Requirements, process maps, SQLite prototype, SQL reports, UAT — Oct 2026
- Wrote business requirements, swimlane process maps of the current and future states, and a data dictionary to replace a fictional career office's three spreadsheets (synthetic data: 40 events, 1,800 students, 30 employers) with one SQLite database whose constraints and triggers enforce one check-in per student per event and automatic waitlisting; migrated the legacy sheets with every change logged to an exceptions table, built six SQL reports and a Tableau dashboard, and passed all 18 acceptance tests.

Pizza Place Project: Business Acquisition Evaluation | Excel pro forma statements, WACC, CAPM, DCF — Feb 2026 – May 2026
- Evaluated a $300,000 pizzeria acquisition on the course's Excel templates: five-year pro forma income statement, balance sheet, and cash flow from a $1,000,000 revenue base (3% growth, 30% food cost), yielding Year 4 free cash flow of $133,500.
- Compared 100% equity (WACC 9.0%; NPV $248,906, IRR 36.71%, payback 2.20 years) with $100,000 equity plus a $200,000 loan at 7% (after-tax debt cost 5.25%, WACC 6.50%; NPV $487,258, IRR 134.34%, payback 0.75 years) against a 9.10% CAPM hurdle rate; recommended the leveraged option.
- Earlier deliverables: site visit and interview; cash, loan, and lease financing of a $4,500 scooter with ratio analysis; 11-slide deck.

Beyond the Firewall: Cybersecurity Industry Analysis | Economics and Strategy, five-person team paper — Sep 2025 – Dec 2025
- Wrote the situation analysis of a 14-page industry paper: a Business Model Canvas of Palo Alto Networks (platform value proposition, petabyte-scale threat data, $1.8 billion R&D, dependence on cloud suppliers) and the SWOT that fed the team's six recommendations; teammates wrote the PESTEL and Five Forces sections.

Strategy Briefs on WSJ-Reported Deals | Economics and Strategy, individual one-page analyses — Oct 2025 – Nov 2025
- Wrote one-page briefs on three deals reported in The Wall Street Journal: Compass's $1.6 billion acquisition of Anywhere Real Estate, JPMorgan's $10 billion Security and Resiliency Initiative, and Google's $24 billion AI infrastructure plan.

PUBLICATIONS

Co-author (documentation and literature review), "Automatic Detection of Bone Fracture Using Deep Neural Models," IEEE, 2025: doi.org/10.1109/InC465408.2025.11256433

EXPERIENCE

New York University, New York, NY

Graduate Event Assistant, Stern School of Business MBA Careers Office — Sep 2026 – Present
- Run check-in and attendance tracking at recruiting events and serve as first point of contact for visiting employers.

Academic Proctor — Mar 2026 – Present
- Maintain confidential examination records under FERPA and review examination materials for accuracy under fixed timelines.

LEADERSHIP AND ACTIVITIES

Event Organizer, Consortium Fest, **Institute of Aeronautical Engineering** — Jul 2025
- Organized a college festival of 400+ participants, managing onboarding and schedules and keeping registration records current.

ADDITIONAL

Skills: SQL (SQLite: joins, aggregation, validation), Excel (DCF, scenario and sensitivity models), Tableau
Portfolio: github.com/Saathvik007 | public.tableau.com/app/profile/saathvik.maheshuni (eight dashboards, 750+ views)
Finance: Self-directed equity investor since 2022, first in Indian and now in U.S. markets; reads 10-K filings and earnings releases
